

FOGMIST™ BAR

Freshness Without Wetness

Even Humidity Distribution

Maintains Weight

Maintains Relative Humidity

Extends Shelf Life

No Wetness

What is FogMist™?

FogMist™ Bar is ProdeW's latest innovation in engineering. FogMist™ Bar is the best technology in the industry for maintaining vital humidity levels to extend product shelf life, appearance and reduce food waste. FogMist™ Bar is easy to install without the costs or the intensive maintenance associated with competitors' systems. Our unique system creates a visually pleasing fog, perfect for produce, meat, seafood, deli and floral displays.

Features

- Maintain relative humidity as high as 96%
- Unique dry fog evaporates immediately into the air
- Pressure can be adjusted to increase and decrease fog density
- Adjustable settings to precisely control humidity levels
- Each FogMist™ Bar is equipped with our FogMist™ tips
- Pressure can be adjusted to increase and decrease fog density
- Minimum water pressure of 50 PSI
- Made of durable plastic (no PVC)

What makes FogMist™ different?

- Droplet size of 6-8 microns
- Even distribution of fog throughout the case.
- No freezing buildup on coils
- No wetness on products

▲ ProdeW's FogMist™ Bar can be used both in produce cases as well as in meat and seafood cases with the same result: Shelf life is extended and products look fresh and appealing.

Our "Greenwise/Energy Wise" mark is our commitment to operate with environmentally sound practices

Specifications

- Case fronts and floors stay dry
- Is easy to install and maintain
- Is customizable with adjustable fog time control
- Has components that are easily hidden under or over display cases
- Will fit into any case and is ideal for displays with 5 or more shelves
- Does not produce excessive moisture in the case or wet the shoppers

- Uses nozzles with plastic tips to minimize clogging and mineral buildup
- Control is mounted separately from other system components for easy accessibility
- Is 100% efficient - water consumption is a small fraction of what traditional systems use
- Sprays fine, fog-like mist to maintain humidity and periodically create a dense cloud cascading down the front of the case

FogMist™ Bar

- Equipped with ProdeW's FogMist™ tips
- Individual shut-off valves
- Humidifies evenly without wetting the cases
- Produces a dry fog, eliminating wet floors

Part #	FMTRCBR-S4-C X - distance between nozzles (in)
Flow Rate	0.1375 GPH per tip - 0.0625 (1/16) GPH per tip
Drop Size	7 - 10 microns
Minimum Air Pressure	15 - 20 PSI
Material	Polypropylene
Connections	1/4 inch QC
Dimensions (in)	48 x 1.25 x 1.25
Weight (lbs)	3
