

NIGHT COVERS

Retain Cool Air, Save Energy

No maintenance

5 Year warranty

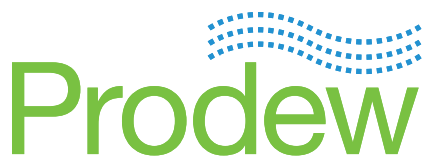

Extend life of refrigerated cases

Save energy during non-operating hours and power outages

Won't chip or fray

What are night covers?

A night cover is a retractable aluminum-coated fabric curtain that can be pulled down to cover an open display case. It has a handle that works as lever to pull down or across the display case to be covered.

Features

- Five year warranty
- Slow-rise mechanism with no oil
- Easy screw or magnetic installation
- Unique, rounded, unbreakable handle
- Perforated fabric prevents condensation
- Aluminum coating won't chip or fray
- Motorized option available
- Optional cassette colors
- Optional non-cassette
- Cassette sizes: 2', 4', or 6'
- Non-cassette sizes: 2', 4', 6', or 8'
- Bottom hold options: magnet or clip
- No need for occasional adjustments or oiling

System applications

Most commonly used for vertical and horizontal cases to conserve energy during non-business hours, ProdeW Night Covers will help reduce your store's energy consumption. They are most beneficial during non-business hours and during periods of restricted sales, such as restricted alcoholic beverage sale times. Additionally, night covers reduce product loss during short power outages.

HORIZONTAL CHILLERS

Frozen foods • Meat • Seafood

VERTICAL CHILLERS

Wine and beer • Dairy • Produce • Floral

Our "Greenwise/Energy Wise" mark is our commitment to operate with environmentally sound practices

How do night covers work?

The aluminum-coated fabric keeps the cold air in the case, preventing it from escaping into the store, thereby reducing energy loss.

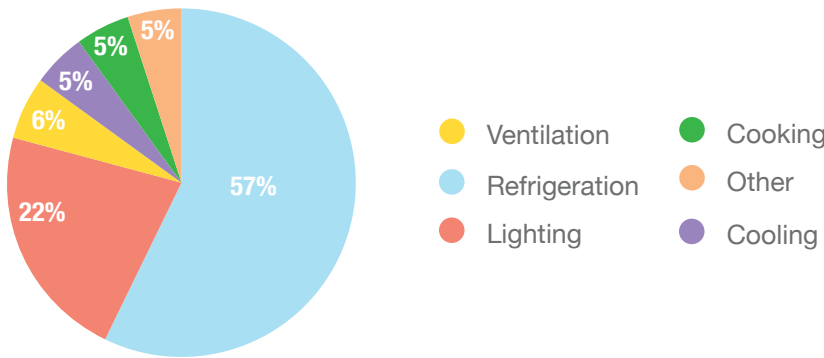

Return on investment

The use of night covers during non-business hours can result in substantial energy savings. Night covers also extend case life by improving compressor efficiency.

An Arizona grocery chain reports saving 112,000 kWh per year in each store with the use of night covers. Based on the national average of 9.74 cents/wKWh, that's a savings of \$10,000 per year!

*** Energy Star estimates that one dollar in energy savings is equivalent to increasing sales by \$59.*

Total percentage of electricity usage

Refrigeration accounts for more than 50% of electricity usage in supermarkets.

As seen on the graph above, more than half of the energy used in supermarkets is destined to refrigeration. Reducing the energy used on refrigeration is the best way to reduce expenses. ProdeW Night Covers successfully cut down the expense of energy by keeping cool air in and hot air out of the case, decreasing the load on the cooler's compressor.

Energy savings & payback period

Operating conditions	% Energy Savings	Payback Period
77°F/60%RH	37.71%	6.6 months

Save \$10,000 per year, per store with night covers. This is equivalent to increasing sales by \$590,000.

Prodew

MISTING

Conveniently Versatile

- Dry floors
- Minimizes loss
- Maintains freshness
- Blends with case
- No PVC

Prodew NSF

FOGMIST™

Fogging for Storage and Display Cases

- Sleek & small - blends with case
- Dry fog - no droplets
- Maintains freshness
- Extends shelf life
- Maintains weight

Prodew NSF

DISPLAY HUMIDITY

Fogging - The Next Generation in Freshness

- distributes humidity evenly
- maintains weight
- maintains relative humidity
- extends shelf life
- no droplets or wetness

Prodew NSF

ETHYLENE CONTROL

Extend Shelf Life

- Slows ripening
- Preserves flowers
- Easy change cartridge
- Circulates air
- Mobile sachets

Prodew NSF

NIGHT COVERS

Retain Cool Air, Save Energy

- No maintenance
- 5 years warranty
- Extend life of refrigerated cases
- Save energy during non-operating hours and power outages
- Won't chip or fray

Prodew NSF

STORAGE HUMIDITY

Optimize relative humidity

- For all room sizes
- Maintain weight
- Maintain RH up to 96%
- Saves water
- No wetness
