

# SaniCart® Compact

## Mobile Sanitization Dispenser

Fine, dry fog composed of small droplets between 6-10 microns

## Next Generation Mobile Sanitization Dispenser

SaniCart® Compact is a mobile, fogging sanitization system, used to protect against surface and airborne viral, bacterial, and mold contamination. The SaniCart® technological breakthrough involves a patented micro-fog nozzle, which sanitizes the entire room with a variety of EPA-approved disinfectant agents.\*

Compared to hand-held or aerosol sprayers, this fine disinfecting fog efficiently covers the complete indoor environment and settles on all surfaces and hard-to-reach areas without residues.

SaniCart® Compact technology helps reduce human error and minimize user exposure to sanitizing chemicals and pathogens, while also saving time, money, and labor.

\* Follow chemical manufacturer guidelines for safety and use.

### ✓ EFFECTIVE

6-10 micron droplet size ensures disinfecting solution coats all surfaces without leaving behind any damaging residue.

### ✓ EFFICIENT

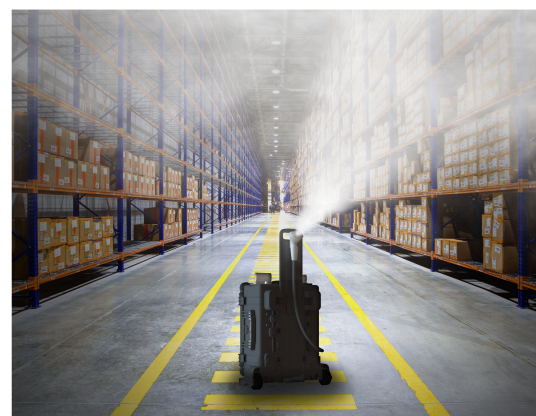

The fine fog gets in all the hard-to-reach nooks and crannies without leaving wetness or residues.

### ✓ VERSATILE

Easy maneuverability allows the SaniCart® to work in any environment where effective sanitation is required.

### ✓ ECONOMICAL

Fraction of the cost compared to manual hand held sanitation processes.

# SaniCart® Compact

## Mobile Sanitization Dispenser

One system with two delivery methods for applications in virtually any industry

### STATIONARY METHOD

Its simplistic design allows the user to move from room to room and set an automated sanitization protocol to deliver a disinfectant of choice.

### HANDHELD METHOD

Users have the capability of detaching the fogger and directly targeting a contaminated area. The fog momentum create a 5 ft throw that ensure it gets deep into the concentrated area.

### SaniCart® Compact Specs and Features:

- Droplet Size: 6 - 10 microns
- Adjustable auto Start/Stop timer
- Compact design for mobile versatility
- Impact resistant, military grade plastic frame
- All-terrain hard rubber wheels
- Fully adjustable and detachable fog nozzle
- Easy carry-on handle
- Spray flow rate of 0.5 GPH
- Dimensions: 22" x 14" x 26"
